Corporate Brochure

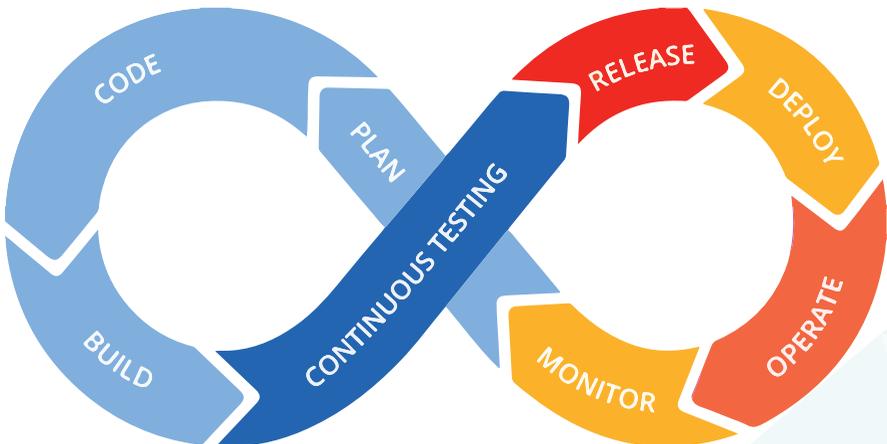

LeadIT Testing Center of Excellence (TCoE) offers comprehensive testing solutions to deliver predictable quality and faster time to market for clients. Our TCoE combines and establishes testing methodology with a wide range of industry standards and testing tools for its clients to get superior quality software, enhance business readiness and realize competitive advantage.

LeadIT engages with small and midsize enterprises to offer flexible engagement models that best suit clients' requirements. Our CoE for Testing aims at fostering excellence in third party testing of software through deployment of competent professionals and implementation of international standards, including a Global Delivery Model.

LeadIT Testing CoE follows the following Approach:

- Leveraging the testing ecosystem to offer comprehensive testing solutions.
- Linking ROI not only to cost but extending it to quality, risk and time to market.
- Understanding and defining the right testing services requirements and scope for the client organization with focus on end-user standpoint.
- Effective integration of our testing services with the client's internal AD team as well as / or third-party vendor providing application services for the client.
- Defining, managing and implementing metrics to manage application testing and quality.
- Defining and managing well-established Service Level Agreements (SLAs) with client.

LeadIT's TCoE's Delivered Business Value

LeadIT Testing service offers testing solutions for Product Application Testing across diversified domains including (but not limited to) distributed environments, cross-platforms, mobile and web. We have performed simple standalone Portal or Product Testing for clients as well as executed testing for complex Products, Applications Solutions with multiple components, potentially sitting across different systems (heterogeneous as well as homogenous). We understand how to synchronize Testing across all subsystems of a solution to identify the business' critical issues which are of vital important to end users. We have successfully implemented Test solutions using different technological platforms such as Java, .NET, PHP, Python and Ruby on Rails which typically utilizes one among MS SQL, MySQL, Oracle or Postgresql for their persistence data needs.

Center of Excellence for Testing drives business value for clients by bringing in best practices in quality assurance capabilities that define and manage their requirements and provision value metrics to enable them to adapt to, and exploit, business opportunities created by the changing technology landscape.

01 A strong vision and ability to manage complex software systems / application testing

02 Maturity to be a value added testing partner for your business enterprise

03 We believe in Total Quality Assurance (TQA) methodology, while delivering value to our clients

04 Full scale independent service offering helps us to dedicate exclusive resources and be focused to serve our clients effectively

05 Dedicated focal point approach, usage of new tools, technologies and trends in QA and testing allows your business utilize the power of next-generation testing technologies

07 Our performance testing strategy helps us identify bottlenecks at the early stages of application testing thus reducing cycle time

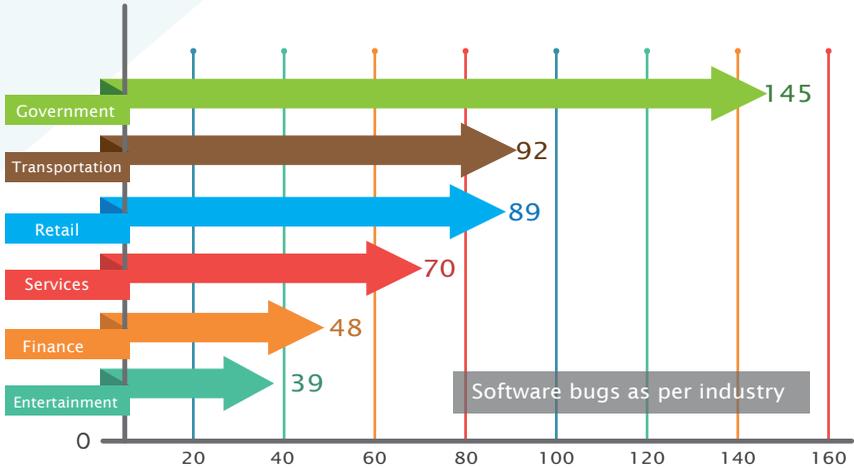

08 Proven track record in delivering results without compromising on quality

Key Strengths and Differentiators

Why need Testing Advisory Services

No enterprise is immune to a software bug

Transportation

8,090,194
Cars recalled

11457
Planes grounding

17 Recorded
deaths

Retail

2.5 Billion
People affected

33% Mobile
app bugs

Services

25% results in
4+ days of outage

1.65 years average
life span of bug

1 known death

Finance

\$ 2.5 billion
Biggest single loss

7.4 avg. Time lost

Entertainment

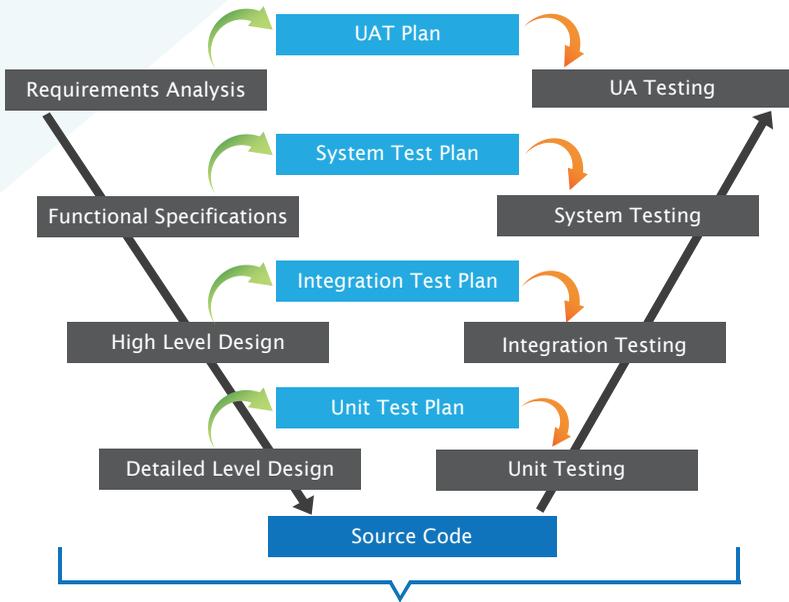

1,369,075,725
People affected

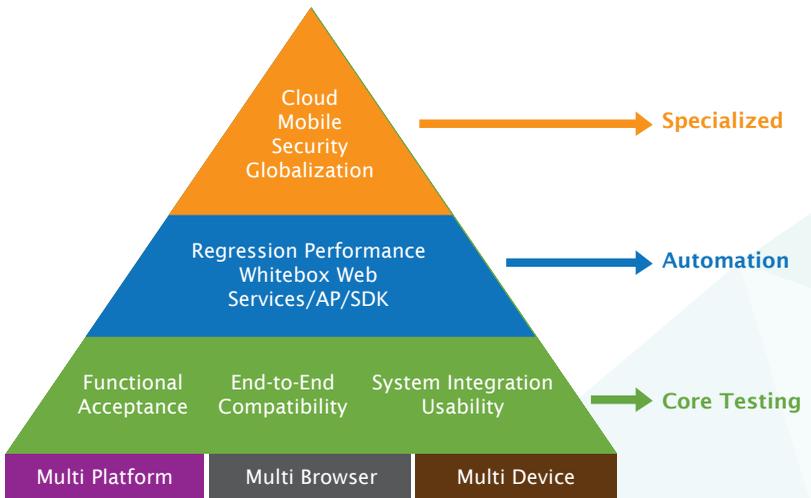

1/3 mobile
app bugs

How often is Testing services Req.?

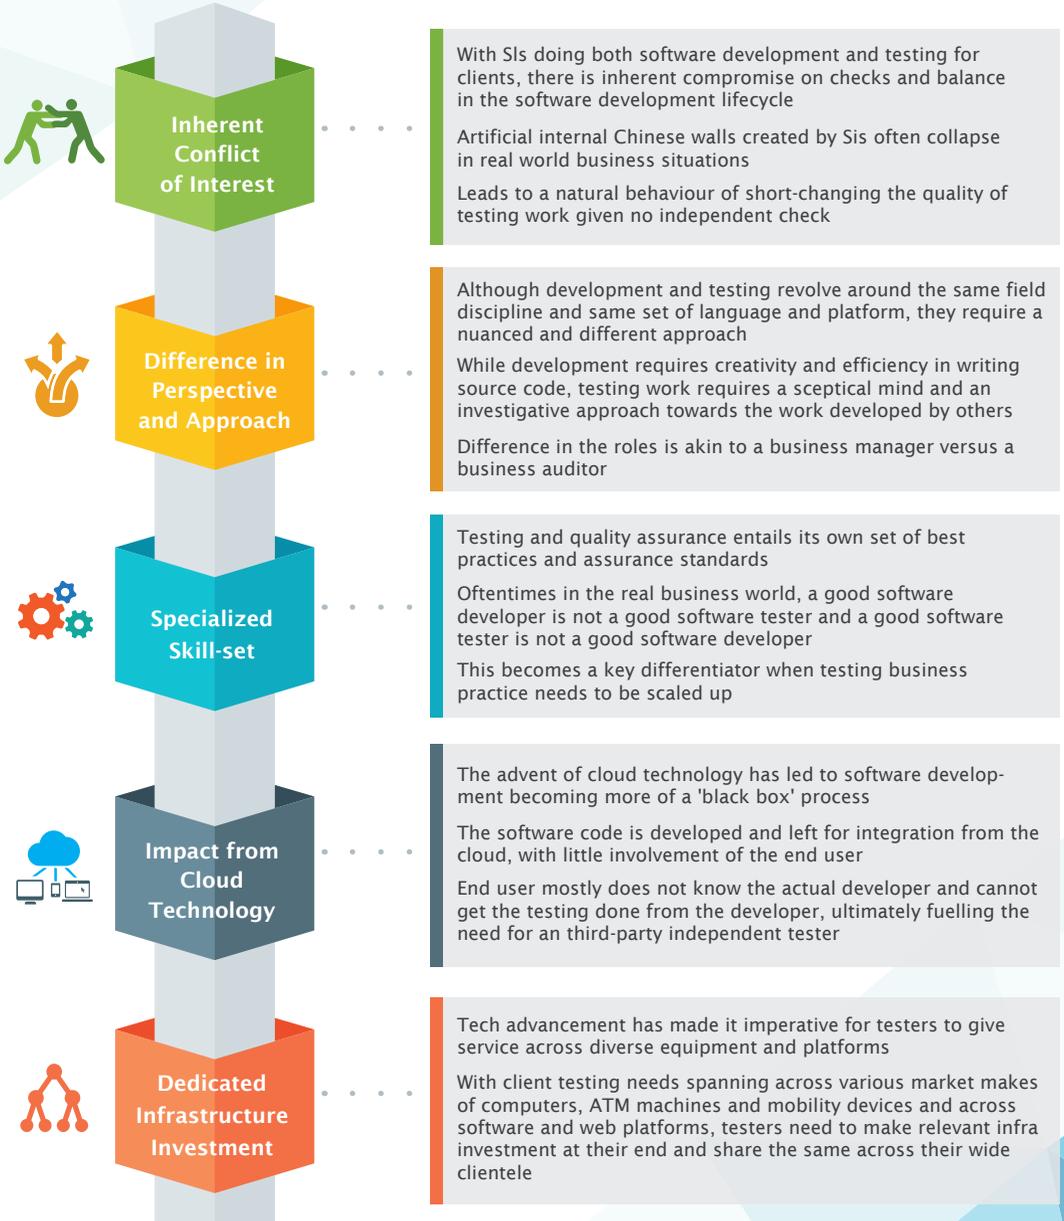

More than 25% of overall software effort is spent
In various types of testing

Code changes, environment changes, device changes
all require additional testing

STS industry has grown in-line with evolution of customer's needs and dynamic technology environment

Markets

Domains

Tools

	USA
	Canada
	UK
	Europe
	Asia PAC
